

NATURE STUDY!

In this section we will try to tell some interesting stories, and facts about birds, animals, trees and those subjects that prove interesting to boys.

When you stop by the wooded area, and you gaze at all the trees, can you tell from the shape of their leaves what type of a tree it is?

While walking on a hike you notice a footprint in the sand--a print of an animal -- what kind was it?

Did you ever take time to sit and watch the ants from an ant hill?

How does a cricket sing?

Nature holds many true and interesting stories that can keep you interested for hours, and hobbies can be made of various types, leaves, bugs, plants and stones.
